EDUCATION

ADITY DEGREE COLLEGE
BS IN COMPUTER SCIENCE
Mar 2019 | Visakhapatnam, AP

Himasekhar Jr. College
Math's, Physics, Chemistry
Mar 2016 | Visakhapatnam, AP

VIVEKANANDA EM SCHOOL
Grad. May 2014 | Visakhapatnam, AP

COURSEWORK

- Natural Language Processing
- Automated boring stuff with Python
- Open CV
- Analytical SQL
- Unix Commands

SKILLS

PROGRAMMING

Over 5000 lines:
- Java
- Python

Familiar:
- CSS
- MySQL
- HTML
- VBA
- C,C#

Hobbies

- Music
- Books

EXPERIENCE

DELOITTE | ASSOCIATE ANALYST
Jan 2020 - Present | Hyderabad, TS

PROJECTS

PRICE SCRAPER BOT
APR 2020 – PRESENT

- Automated fetching of data sets from multiple websites which reduces the manual effort using selenium.
- Created flask API's and integrated with angular frontend.
- Accountable for delivery of complete backend.
- Created Reusable and configurable components with industry standard design patterns for all the features to reduce the development effort and effort of future modifications.
- Implemented logging and Exception Handling for backend services.
- Integrated with MySQL and Performed CRUD operations

Technologies: **Selenium, Flask, Python, SQL**

BROADCOM SUPPORT
JAN 2020 – PRESENT

- Developed an issue resolving bot which provides necessary commands which reduce the effort of resolving duplicate issues.
- Refine effective support processes for continuous improvement.
- Work directly with clients (internal and external) to resolve issues with the Company's proprietary software products and services
- Recreate and verify complex performance and environmental issues with limited access to the production environment
- Ingestion Scripting - creating, updating & maintaining of Shell/Perl scripts that facilitate ingesting
- Communication - participate in meetings, perform verbal and written communication with other technical and business operations teams
- Create and maintain formal documentation for all developments

Technologies: **Service Now, VBA, Python, SQL, PERL**

MDM ELEVATE SCRAPER BOT
MAY 2020 – PRESENT

- Automated fetching of data sets from multiple websites which reduces the manual effort using selenium.
- Created flask API's and integrated with angular frontend.
- Accountable for delivery of complete backend.
- Created Reusable and configurable components with industry standard design patterns for all the features to reduce the development effort and effort of future modifications.
- Implemented logging and Exception Handling for backend services.
- Integrated with MySQL and Performed CRUD operations

Technologies: **Selenium, Flask, Python, SQL,HTML5,CSS**
